QUICKCHECK II

HOLD AN ENGINE IN THE PALM OF YOUR HAND.

QUICKCHECK II

HOLD AN ENGINE IN THE PALM OF YOUR HAND.

Cummins QuickCheck II. Grab It And Go!

If you own a Dodge Ram Turbo Diesel ('98 1/2 or newer), Cummins QuickCheck II can make your life a lot easier.

Cummins QuickCheck II reads and captures engine data quickly and conveniently from any Dodge Ram with electronic fuel injection. You can even use it to read data from other manufacturers' (SAE J1587/SAE J1939) engines. So you can use it on your farm tractor, construction equipment, commercial truck – any

kind of equipment with an electronic diesel engine.*

Yet for all its applications and functionality, Cummins QuickCheck II fits comfortably in your pocket or the palm of your hand. So it can go anywhere you go.

Diagnosis: Remarkable.

If you already own a Palm™ or HandEra™ handheld device (see bottom of page for qualifying models**), you know what a versatile tool it is: calendar, calculator, address book, alarm clock, reminder pad and more. Now, you can make it do even more, with Cummins QuickCheck II.

Just plug QuickCheck II into your engine control module, and you can view electronically controlled engine sensors and diagnostic data. QuickCheck II also lets you save this data to download into your personal computer later.

Installation is quick and easy. You can connect QuickCheck II directly under the hood in your Dodge Ram – or you can run a cable through the firewall hole for the emergency brake and mount it in the cab. This simple, easy process takes less than ten minutes, and all the materials you need are provided. See your QuickCheck II owners manual for complete details.

Small Details Are A Big Deal.

With the parameter screen on QuickCheck II, you can check a range of data from sensors and switches to engine diagnostic information, including:

- Engine load and speed
- Coolant and intake manifold temperatures
- Oil pressure
- Battery voltage
- Output torque
- And more

Some Hard Facts On Hardware And Software.

Cummins QuickCheck II is made specifically to operate on handheld devices by Palm or HandEra, which must be purchased separately. It consists of a custom datalink adapter, an interface cable and connector, and the diagnostic software application. The adapter easily snaps on, letting you instantly communicate through your equipment's datalink connector.

QuickCheck II software installs just like any other program for a handheld device. Load it in, and you'll be ready to go. Instantly.

See It. Try It. Buy It.

For more information, a demonstration or to purchase Cummins QuickCheck II, please see your Cummins dealer or distributor. You can also order Cummins QuickCheck II online at www.cummins.powerstore.com or by calling toll-free 1-800-646-5609.

*A separate software application is required for equipment other than Dodge Ram Turbo Diesels.
 **Cummins QuickCheck II software is compatible with Palm™ III, IIIe, IIIx, VII and V (additional adapter required for V) handheld devices. For information on hardware compatibility, please call Palm at 847-262-PALM or check www.palm.com before purchasing. It is also compatible with the HandEra™ 330 and TRGpro.™ Please see www.handera.com for details.
