

RUN HARD. DREAM BIG.

ROADRELAY™ 4

For Cummins 24-Valve Turbo Diesel

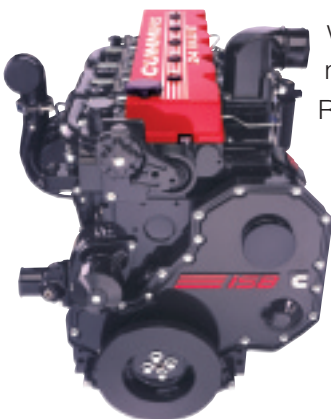

IN TOUCH WITH YOUR DREAM.

It's the pickup truck of your dreams. One with all the pulling power you could ever need, whether you're towing a horse trailer, a fifth wheel, a 26-foot power boat, or just loading the back end with concrete blocks. Nothing's going to get in your way – and that's why you need Cummins RoadRelay™ 4.

GET THE INSIDE SCOOP ON YOUR ENGINE.

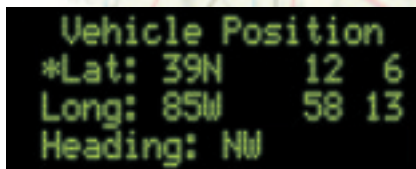

Cummins RoadRelay 4 lets you haul big loads confidently, knowing exactly what is going on inside your engine – right from the driver's seat of your truck.

RoadRelay 4's information display shows engine, vehicle and trip information including everything from your miles per gallon and average speed to your estimated time of arrival. It lets you monitor engine rpm, fuel economy, coolant temperature and much, much more – as you drive. You can even compare driving performance between two or more drivers!

LOCATION, LOCATION, LOCATION.

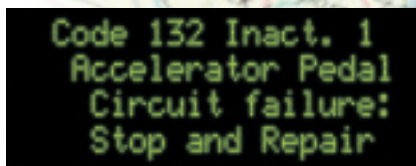

Part of the dream of owning a truck is being able to go places other vehicles can't, including some pretty remote locations. To make sure you always know where you are, you can get a special version of Cummins RoadRelay 4 equipped with GPS – which lets you immediately know exactly where you are, using global positioning satellites.

KEEPING YOUR DREAM ON SCHEDULE.

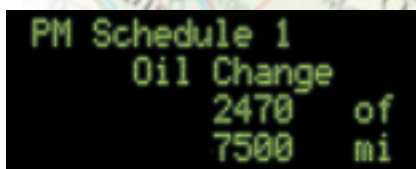

Cummins RoadRelay 4 helps make driving worry-free. If you do encounter a problem on the road – even a temporary one – RoadRelay 4 will display the fault code and tell you immediately what the problem is – and what you need to do about it. RoadRelay 4 automatically stores this information so that any qualified technician can quickly and accurately make the needed repair and get you back on the road. Saving you time – and money.

REMINDING YOU WHEN SERVICE IS DUE.

You won't need to keep a service log when you have Cummins RoadRelay 4 onboard. You simply tell it how often you want to change your oil and filters or check other service items – and Cummins RoadRelay 4 automatically reminds you when service is due. You can enter as many as four different service events. Cummins RoadRelay 4 can also be used to log your pickup's service history – which can be very valuable at trade-in time.

EASY READING.

Cummins RoadRelay 4 is designed for ease of use, with a four-line display that's just as easy to read. There's a brightness control you can adjust, and the twelve keys are backlit for easy viewing, day or night. And, the display automatically dims itself when your headlights come on for night driving.

RPM 1835 rpm
Boost Pres 12 psi
Load 85%

THE TRUCKER'S BEST FRIEND CAN BE YOURS TOO.

Since 1991, Cummins RoadRelay™ has been the #1 electronic systems monitor for 18-wheelers. Now, you can have the same kind of valuable information in your pickup truck. RoadRelay 4 is available as an aftermarket installation through the Cummins distribution network.

For more details, please contact your local Cummins distributor. Or you can call Cummins toll-free at 1-800-DIESELS (1-800-343-7357). The Cummins fax number is 1-800-232-6393. E-mail users, contact powermaster@cummins.com or visit our web site at www.cummins.com.
